

Mobiramp TBS

*ALU series
Compact, foldable
ramp*

Do you recognize this situation?

In all these cases, a MRL mobile ramp from the MOBIRAMP ALU series is the solution to your accessibility problem.

Between the living room and the kitchen there is a very annoying step of a few centimeters. So every time I go to the kitchen I have to be very careful...

Recently my grandmother heavily fell over the small step at the bedroom door. She is now recovering but we definitely need to find a solution for this...

Model	Length cm	Width cm	Advised Height cm	Max. Height cm	Weight kg	Load kg
TBS 04077	76	2 x 20	2	4	3	300

Mobiramp is your professional advisor, manufacturer and supplier of high-quality accessibility solutions.

Mobiramp is a European company that develops and produces solutions to make houses and buildings accessible. Thanks to our many years of practical experience in solving (temporary) accessibility problems for private individuals as well as in the professional care sector, we always succeed in finding the right solutions. The result is a complete and high-quality range of accessibility products at a friendly price.

Advantages of the TBS:

EASY TO CARRY:

By using light aluminium, the weight of the ramp was reduced to a minimum.

COMPACT:

The lightweight ramp can be folded compactly into a "suitcase" with handles. This makes the ramp easy to handle and transport in the closed position.

ANTI-SLIP:

The surface of the ramp is equipped with a profile with perfect anti-slip properties in all weather conditions.

ROBUST:

Even under heavy load, the deflection of the ramp is limited to a minimum. The solid construction ensures a comfortable feeling during use. The hinge runs along the entire length of the ramp and has been tested under severe conditions.

EUROPEAN QUALITY:

No ramp leaves our production department without a thorough inspection and test of its reliability.

DESIGN:

Mobiramp has succeeded in combining functionality and a beautiful design by choosing the right materials and colours.

AVAILABILITY:

Mobiramp always has a large stock of all parts at our production site, which enables us to assemble and deliver quickly.

CUSTOMIZATION:

The TBS ramp is a modular product that is easily adaptable. Customization on request is therefore possible.

SUSTAINABILITY:

All materials used on the ALU ramps are 100% recyclable and therefore good for our environment.

PRICE / QUALITY:

Because this ramp is modular we can keep prices low and at the same time offer high quality.
