

## Mobiramp TBL

*ALU series  
Ramp with flap*

### Do you recognize this situation?

In all these cases, a TBL mobile ramp from the MOBIRAMP ALU series is the solution to your accessibility problem.

My terrace is lower than the floor inside the house. Moreover, I also have to cross the doorstep of the sliding door when I want to go outside...

My grandmother would like to visit us but because of her wheelchair it is difficult to drive in along the only door that is wide enough, the sliding door...

Model	Length cm	Width cm	Advised Height cm	Max. Height cm	Weight kg	Load kg
TBL 08080	80 + 40	80	8	12	14.5	300
TBL 12080	120 + 40	80	12	18	18.5	300

## Mobiramp is your professional advisor, manufacturer and supplier of high-quality accessibility solutions.

Mobiramp is a European company that develops and produces solutions to make houses and buildings accessible. Thanks to our many years of practical experience in solving (temporary) accessibility problems for private individuals as well as in the professional care sector, we always succeed in finding the right solutions. The result is a complete and high-quality range of accessibility products at a friendly price.

### Advantages of the TBL:

#### **EASY TO CARRY:**

By using light aluminium, the weight of the ramp was reduced to a minimum.

#### **PRACTICAL:**

The flap of this lightweight ramp is very easy to close. This is especially useful when you want to leave the ramp in place and the sliding door needs to be closed.

The handle on the side ensures that the ramp is easy to handle and transport.

#### **HEIGHT ADJUSTABLE:**

The support legs on the side are infinitely adjustable.

#### **ANTI-SLIP:**

The surface of the ramp is equipped with a profile with perfect anti-slip properties in all weather conditions.

#### **SAFETY:**

On the sides of the ramp there are solid borders to prevent slide-off accidents.

#### **ROBUST:**

Even under heavy loads, the deflection of the ramp is kept to a minimum. The sturdy construction provides a comfortable feeling during use.

#### **EUROPEAN QUALITY:**

No ramp leaves our production department without a thorough inspection and test of its reliability.

#### **DESIGN:**

Mobiramp has succeeded in combining functionality and a beautiful design by choosing the right materials and colours.

#### **AVAILABILITY:**

Mobiramp always has a large stock of all parts at our production site, which enables us to assemble and deliver quickly.

#### **CUSTOMIZATION:**

The TBL ramp is a modular product that is easily adaptable. Customization on request is therefore possible.

#### **SUSTAINABILITY:**

All materials used on the ALU ramps are 100% recyclable and therefore good for our environment.

#### **PRIJS / KWALITEIT:**

Because this ramp is modular we can keep prices low and at the same time offer high quality.
