

## Mobiramp MRL

*ALU series  
Foldable in width*

*"A TOP product"*

### Do you recognize this situation?

In all these cases, a MRL mobile ramp from the MOBIRAMP ALU series is the solution to your accessibility problem.

My legs are not so young anymore and when I want to go for a walk I first have to get down 3 high stairs at my door. A difficult job.....

I have several older clients in my barbershop. For some of them it's getting more and more difficult to take those nasty stairs at the entrance...

Model	Length cm	Width cm	Advised Height cm	Max. Height cm	Weight kg	Load kg
MRL 20080	200	80	20	40	24	300
MRL 24080	240	80	24	48	27.5	300

## Mobiramp is your professional advisor, manufacturer and supplier of high-quality accessibility solutions.

Mobiramp is a European company that develops and produces solutions to make houses and buildings accessible. Thanks to our many years of practical experience in solving (temporary) accessibility problems for private individuals as well as in the professional care sector, we always succeed in finding the right solutions. The result is a complete and high-quality range of accessibility products at a friendly price.

### Advantages of the MRL:

#### **EASY TO CARRY:**

By using light aluminium, the weight of the ramp was reduced to a minimum.

The (optional) wheels make it even easier to move the ramp.

#### **COMPACT:**

The lightweight ramp can be folded compactly into a "suitcase" with handles. This makes the ramp easy to handle and transport in the closed position.

#### **ANTI-SLIP:**

The surface of the ramp is equipped with a profile with perfect anti-slip properties in all weather conditions.

#### **SAFETY:**

On the sides of the ramp there are solid borders to prevent slide-off accidents. A rubber anti-slip profile on the underside of the ramp ensures that the ramp remains in place on the borders or stairs.

#### **ROBUST:**

Even under heavy loads, the deflection of the ramp is kept to a minimum. The sturdy construction provides a comfortable feeling during use. The hinge was tested under severe conditions.

#### **EUROPEAN QUALITY:**

No ramp leaves our production department without a thorough inspection and test of its reliability.

#### **DESIGN:**

Mobiramp has succeeded in combining functionality and a beautiful design by choosing the right materials and colours.

#### **AVAILABILITY:**

Mobiramp always has a large stock of all parts at our production site, which enables us to assemble and deliver quickly.

#### **CUSTOMIZATION:**

The MRL ramp is a modular product that is easily adaptable. Customization on request is therefore possible.

#### **SUSTAINABILITY:**

All materials used on the ALU ramps are 100% recyclable and therefore good for our environment.

#### **PRICE / QUALITY:**

Because this ramp is modular we can keep prices low and at the same time offer high quality.
