

## Mobiramp MRS

*ALU series  
Foldable in length*

### Do you recognize this situation?

In all these cases, an MRS mobile ramp from the MOBIRAMP ALU series is the solution to your accessibility problem.

I can't walk that well anymore and when I want to go for a walk I first have to overcome a small step. Then another 2 difficult steps follow....

My grandmother would like to visit us but with her wheelchair it is difficult to pass the small, annoying stairs at the front door....

Model	Length cm	Width cm	Advised Height cm	Max. Height cm	Weight kg	Load kg
MRS 06080	60	80	6	12	7	300
MRS 10080	100	80	10	20	11	300
MRS 14080	140	80	14	28	15	300
MRS 18018	180	80	18	36	21	300

## Mobiramp is your professional advisor, manufacturer and supplier of high-quality accessibility solutions.

Mobiramp is a European company that develops and produces solutions to make houses and buildings accessible. Thanks to our many years of practical experience in solving (temporary) accessibility problems for private individuals as well as in the professional care sector, we always succeed in finding the right solutions. The result is a complete and high-quality range of accessibility products at a friendly price.

### Advantages of the MRS:

#### **EASY TO CARRY:**

By using light aluminium, the weight of the ramp was reduced to a minimum.

#### **COMPACT:**

The lightweight ramp can be folded compactly into a "suitcase" with handle. This makes the ramp easy to handle and transport. In the closed position, a Velcro fastener ensures stable locking.

#### **ANTI-SLIP:**

The surface of the ramp is equipped with a profile with perfect anti-slip properties in all weather conditions.

#### **SAFETY:**

On the sides of the ramp there are solid borders to prevent slide-off accidents. A rubber anti-slip profile on the underside of the ramp ensures that the ramp remains in place on the borders or stairs.

#### **ROBUST:**

Even under heavy load, the deflection of the ramp is limited to a minimum. The solid construction ensures a comfortable feeling during use. The hinge runs along the entire length of the ramp and has been tested under severe conditions.

#### **EUROPEAN QUALITY:**

No ramp leaves our production department without a thorough inspection and test of its reliability.

#### **DESIGN:**

Mobiramp has succeeded in combining functionality and a beautiful design by choosing the right materials and colours.

#### **AVAILABILITY:**

Mobiramp always has a large stock of all parts at our production site, which enables us to assemble and deliver quickly.

#### **CUSTOMIZATION:**

The MRS ramp is a modular product that is easily adaptable. Customization on request is therefore possible.

#### **SUSTAINABILITY:**

All materials used on the ALU ramps are 100% recyclable and therefore good for our environment.

#### **PRICE / QUALITY:**

Because this ramp is modular we can keep prices low and at the same time offer high quality.
